GoCarbon Fibre 2018

Smithers Rapra have been organising the world renowned Global Outlook for Carbon Fibre conferences in both Europe and North America for over 20 years. As the only conference focused 100% on carbon fibre, the conferences provide a unique global forum for carbon fibre manufacturers, composite industry executives, technologists and new entrants to receive a comprehensive update on the outlook for growth, supply and demand and recycling of carbon fibres. Discussions at the conferences focus predominantly around end user applications, with insights from OEMs in aerospace, automotive, rail, sports equipment, marine, wind and more, alternative PAN and precursor applications, sustainable materials and methods, the role of recycling, novel approaches to composites manufacturing, new technologies for carbon fibre production, circular economy opportunities and much more. Smithers Rapra entice the leading global carbon fibre players to hear the latest thoughts from the leaders in the business, as well as what they see as the challenges for the future providing attendees with a unique, objective view on the carbon fibre market.

Future Food Tech

Future Food-Tech is an international innovation and investment summit, held annually in London, San Francisco and New York. Focused on harnessing technology to address the critical issues facing the global food industry, the summit brings together global food-brands, investors and entrepreneurs to forge new partnerships and accelerate the adoption of innovative solutions and products to meet the growing global demand for safe, traceable, nutritious foods. This year in London we'll address new routes to commercialisation for alternative proteins and healthy ingredients, the growing potential for gene-editing, advances in personalised nutrition, and how disruptive distribution models can help drive consumer adoption and reduce waste. Join us for two days of debate and deal-making as we lay the foundations for tomorrow's food sector.

Textile 4.0

If you're a strategic decision maker determined to implement change, then Innovate Textile & Apparel (ITA) is the one event in the year that you can't afford to miss. Over three days, ITA hosts three complementary conferences, each exploring a different theme with innovation at its core, and together offering vital insights into the most important areas of business and product strategy in textiles and apparel. These elements are: The Textile 4.0 Conference, Re:Think Materials and The Textile Business Futures. This year we are located at the Novotel Amsterdam City venue and Holiday Inn Amsterdam, with great meeting spaces, a host of new session formats, and networking events.

TCT Conference @ formnext

For over twenty years it has been the TCT Group's mission to accelerate the adoption of technologies that promote innovation in the design-to-manufacturing process chain. TCT aims to deliver world-class conferences on the latest trends from the world of additive manufacturing and 3D printing. The attendees can depend on well-balanced seminar programmes, consisting of professional talks from renowned academic researchers, industry experts, market analysts and product evangelists. TCT conference @ formnext is an educational platform. It features the industry's most inspirational figures who share their experience on how 3D technologies are making a real impact in the manufacturing world. This is where future insights and developments in aerospace, automotive, medical and dental sectors are examined. Consumer product design and new research on materials and processes is also thoroughly analysed here. The practical case studies and panel sessions not only supply the attendees with a detailed overview of this fast-growing industry but also advise on how to successfully adopt AM.
